

TechNarts positions its AI tool, NART-elligence, where practical intelligence can create real operational impact bringing sharper analysis, stronger foresight, and faster decisions into the parts of the network that matter most.

This is what NART-elligence delivers

Fiber Anomaly Detection

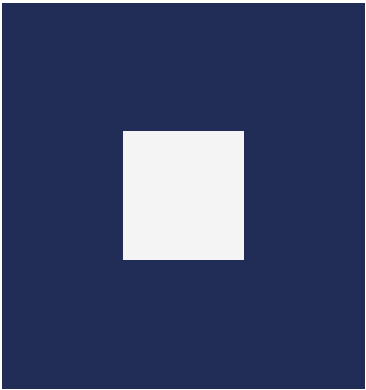

Conversational ChatOps Copilot

AI Powered Config Analyzer

Traffic Utilization Prediction

SLA Compliance Prediction

where ai hype ends and network intelligence begins.

about technarts

Since 2007, TechNarts has been building tailored OSS solutions for the telecom industry, rooted in real business and operational needs. Its role goes beyond delivery, with a thoughtful and flexible approach shaped around each customer's goals. With expert delivery, practical thinking, and industry-recognized credibility, TechNarts builds partnerships designed to last.

OSS at the core, engineering at the edge.

Network Assurance

Network Assurance gives operators clear insight into service health and operational impact across complex networks, helping them detect issues earlier and keep service delivery under control.

NART OSS
Suite

One OSS to Rule 'em All

**Network Fulfillment
& Orchestration**

Network Assurance gives operators clear insight into service health and operational impact across complex networks, helping them detect issues earlier and keep service delivery under control.

Cross-functional Plug-ins

Cross-functional Plug-ins extend Nart OSS with added visibility, intelligence, and operational depth, helping operators understand more, act faster, and make better decisions across the OSS landscape.
