

NART-NETWORK PROVISIONING & ACTIVATION

Accelerate Network Deployment and Service Rollouts with Confidence

Product Overview

Manual service configuration and step-by-step terminal activation drain valuable engineering hours and introduce critical configuration errors. This operational bottleneck extends the onboarding cycle, delays revenue generation (Time-to-Revenue), and reduces customer satisfaction.

NART-Network Provisioning & Activation combines automated configuration, remote activation, and zero-touch service provisioning into standardized, repeatable workflows. It communicates seamlessly across multi-vendor equipment to push configurations instantly, regardless of network scale.

Key Features

Automated Service Provisioning & Activation

Remote, zero-touch configuration and activation of new devices and services minimizing manual intervention

Faster Deployment

Dramatically accelerates installation, activation, and service rollout times compared to manual processes

Error-Free & Consistent Workflows

Repeatable, automated procedures eliminate human errors and ensure standardized service delivery

Remote Service Enablement

Enables complete remote activation and provisioning, improving operational flexibility.

Recommended Plug-ins

NART-Network Provisioning & Activation can be extended with the following plug-ins to deliver deeper intelligence, faster resolution, and greater automation

NART-E2E Network Topology Plug-in

NART-Impact Analysis Plug-in

NART-Network Planning Plug-in

NART-Observability and Monitoring Plug-in

NART-Network Optimization Plug-in

NART-Dynamic Reporting Plug-in

Technarts develops next-generation OSS solutions that automate, monitor, and optimize telecom networks. Since 2007, we have helped service providers achieve scalable operations and seamless multi-vendor integration through TM Forum-aligned modular platforms.

TechNarts is a leading OSS provider with deep expertise in telecom software since 2007. We deliver modular, future-proof solutions for **Resource Management, Network Assurance and Network Fulfillment & Orchestration**. Our systems align with **TM Forum's ODA and Open APIs**, helping operators boost service reliability, optimize resources, and accelerate digital transformation.

OSS Vision & Value Proposition

As telecom networks grow more complex with 5G, IoT, and AI, traditional OSS environments struggle to keep pace. TechNarts transforms OSS into a **unified, intelligent, and automated** ecosystem that enables real-time visibility, operational agility, and zero-touch automation.

We deliver OSS platforms that are:

Automated
Enabling closed-loop, zero-touch operations

Intelligent
Leveraging AI/ML for predictive insights and optimization

Agile
Scalable across hybrid, dynamic networks

Our value is anchored on:

Multi-Vendor Network Integration

End-to-End Visibility

Modular Architecture

TM Forum Compliant Interoperability

Secure On-Premise Deployment

Data Sovereignty & Regulatory Alignment

Closed-loop Network Assurance

Scalable 5G & Hybrid Infrastructure Support

Aligned with TM Forum's ODA and Open APIs, TechNarts empowers CSPs to evolve from reactive to autonomous operations; boosting efficiency, resilience, and customer satisfaction.
