

NART OSS Suite

One OSS to Rule 'em All

NART OSS Suite brings TechNarts' modular products together in a structured operational framework.

At its core are four product families, each built to address a different level of operational complexity.

Designed to stay modular without feeling fragmented, **NART OSS Suite** supports both focused standalone capabilities and broader product bundles, while plug-ins adding extra features where needed.

where AI hype
ends and network
intelligence
begins.

NART-elligence is TechNarts' practical AI approach for telecom operations, designed to apply intelligence where it creates real operational value rather than adding unnecessary complexity. Built on real network operational experience, **NART-elligence** help operators move from reactive operations toward resilient, proactive, and value-driven networks.

This is what NART-elligence delivers:

-  Conversational ChatOps Copilot
-  AI Powered Config Analyzer
-  Traffic Utilization Prediction
-  SLA Compliance Prediction
-  Fiber Anomaly Detection

not boxed products.
operational fit.

Real operations do not arrive in neat boxes, so the approach does not stay trapped in them.

TechNarts brings modular OSS products together as bundles built around actual operational needs, with the flexibility to extend, adapt, and evolve when needed. Backed by a standards-aware, integration-ready mindset shaped through our TM Forum journey,

TechNarts builds for the ecosystem, not around it.

built around operational need

about

Since 2007, TechNarts has been building tailored OSS solutions for the telecom industry, rooted in real business and operational needs. More than a vendor, it offers a thoughtful and flexible approach shaped around each customer's goals. TechNarts' approach is **collaborative, practical, and guided by a simple principle**: understand the need, shape the right solution, and deliver with purpose. **With a strong expert team, on-time delivery, and industry-recognized credibility, TechNarts builds partnerships designed to last.**
